SADC HUMANITARIAN AND EMERGENCY OPERATIONS CENTRE

TRAINING MANUAL

Security and Access

Access Control & Security Reporting | Personnel Security | Facility & Equipment Security

Based on SOP Volume 7, Version 2.0 — UNDAC ERT Mission Cycle

Classification:	CONFIDENTIAL
Version:	1.0
Effective Date:	April 2026
SOP Reference:	Volume 7, v2.0 (SOPs 7.1–7.3)
Annexes:	14 Operational Templates (7.A to 7.N)
Target Audience:	Security Focal Points, Head of Operations, All SHOC Staff, Security Vendors

Benchmarked: ISO 22301:2019 | ISO 45001:2018 | UNDAC 8th Ed. | SADC DRMSS | IFRC Security Framework | VPSHR

11. Assessment and Competency Verification 14

1. Introduction and Purpose

This Training Manual is a companion to SHOC SOP Volume 7: Security and Access, Version 2.0. It provides Security Focal Points, the Head of Operations, all SHOC staff, and outsourced security vendors with practical, SOP-by-SOP guidance on the three interconnected security procedures aligned to the UNDAC ERT Mission Cycle.

The three SOPs form an integrated security framework: **SOP 7.1 (Access Control and Security Reporting), SOP 7.2 (Personnel Security), and SOP 7.3 (Facility and Equipment Security).**

Defence in Depth principle: Multiple, layered controls from perimeter to core assets (gates, guards, CCTV, credentials), informed by the Comprehensive Physical Security Assessment (SADC/3/5/2/139). All security measures must respect human rights and VPSHR, avoiding discrimination or unnecessary intrusion.

2. Terms and Key Definitions

Abbreviation	Full Form
AMS	Access Management System
AAR	After-Action Review
BGYOR	Blue, Green, Yellow, Orange, Red — Risk rating system
CCTV	Closed-Circuit Television
EOC	Emergency Operations Centre
IMS	Incident Management System
NDMA	National Disaster Management Authority
RACI	Responsible, Accountable, Consulted, Informed
SHOC	SADC Humanitarian and Emergency Operations Centre
SLA	Service Level Agreement
UNDAC	United Nations Disaster Assessment and Coordination
UPS	Uninterruptible Power Supply
VPSHR	Voluntary Principles on Security and Human Rights

Key definitions: Access Control — policies, technologies, procedures regulating entry. Critical Zone — areas where compromise affects SHOC operations. Defence in Depth — layered controls protecting same assets. Security Level (Green/Yellow/Orange/Red) — pre-defined posture states driving specific procedures.

3. How to Use This Manual

All three SOPs follow the UNDAC ERT Mission Cycle with three phases. Each section provides: Phase Purpose, Key Tasks, Annex Toolkit, Risk Analysis, and Trainer's Notes.

3.1 Three-Phase Security Lifecycle

Phase	Security Focus	Key Outputs
Pre-Mission (Preparedness)	Establish baseline: zones, credentials, vendor onboarding, vetting, asset registers, drills	Access Zoning Map, Personnel Security Register, Maintenance Plans, Drill Reports
On-Mission (Operations)	Heightened posture: restricted access, surge management, real-time monitoring, movement control	Security Level Declaration, Access Logs, Incident Reports, Movement Logs
Mission-End (Recovery)	Reconciliation, audit, lessons: access log review, vendor SLA review, damage assessment, AAR	Audit Reports, SLA Reviews, Damage Assessments, Updated Risk Registers

3.2 Security Level Framework

Level	Description	Decision Authority
Green	Normal operations; routine security posture	Head of Operations
Yellow	Elevated risk; enhanced monitoring and access controls	Head of Operations
Orange	Attempted or confirmed breach; restricted access; NDMA notified	Executive Director
Red	Imminent threat to life/infrastructure; lockdown; law enforcement	Executive Director

4. SOP 7.1: Access Control and Security Reporting

SOP Reference: SOP 7.1 (Phases 1–3)

SOP 7.1 establishes a unified, auditable system for managing access to SHOC facilities, covering physical access, security infrastructure, and incident reporting.

4.1 Pre-Mission (Preparedness)

Step	Key Actions	Timeline	Annex
Map Facilities and Zones	Classify zones (Public, Controlled, Restricted, Critical) based on risk assessment and asset location	Within 30 days; review annually	—
Define Access Levels and Credentials	Define clearance Levels 1–4; link to staff roles; configure badge/biometric profiles in AMS	Within 15 days after zoning	—
Onboard Security Vendor	Finalise MOUs/SLAs (guard numbers, competencies, vetting, shifts, reporting lines); joint induction	Within 30 days of contract	7.C
Establish Visitor/Contractor Procedures	Approve visitor categories; implement Visitor Register; train reception and guards on VPSHR	Within 15 days of onboarding	7.A
Test Systems and Drills	Functional tests of AMS, CCTV, alarms, barriers, backup power; lockdown and evacuation drill annually	Bi-annually	7.D, 7.J

4.2 On-Mission (Operations)

Step	Key Actions	Timeline	Annex
Activate Security Level	Head Ops declares Level (Green/Yellow/Orange/Red); notify all staff and security vendor	≤1 hour	—
Implement Restricted Access	Lock non-essential entrances; enforce Need-to-Go/Need-to-Know for Restricted/Critical zones	≤2 hours	—
Surge Visitor Management	Pre-registration; verify ID; issue temporary time-bound badges; log all visitors in AMS	Continuous (5–10 min/visitor)	7.A
Real-Time Monitoring	Control Room monitors CCTV, access logs, alarms; track occupancy dashboards; log anomalies	Continuous (15 min log)	7.B
Incident Escalation	Vendor supervisor → Security Focal Point immediately; Head Ops decides containment/lockdown; Orange/Red → ED	10 min initial; 2hr full report	7.B

4.3 Mission-End (Recovery)

Access log and CCTV reconciliation (≤10 working days); facilities and asset security review (≤15 days); vendor SLA performance review with Annex 7.C (≤20 days); After-Action Review with Operations, EW, ICT, HR, and security vendor; update Security Risk Register (Annex 7.D) and propose SOP revisions (≤30 days).

4.4 Trainer's Notes

Critical exercise: Simulate an On-Mission scenario where Security Level escalates from Green to Orange due to an attempted breach. Require trainees to: (a) declare the Level within 1 hour, (b) implement restricted access within 2 hours, (c) log the incident using Annex 7.B within 15 minutes, (d) execute the escalation to ED within 10 minutes, and (e) produce the full incident report within 2 hours. Test whether the trainee correctly applies the Need-to-Go/Need-to-Know access restriction.

5. SOP 7.2: Personnel Security

SOP Reference: SOP 7.2 (Phases 1–3)

SOP 7.2 governs vetting and safeguarding of all SHOC personnel, outsourced security, visitors, and contractors. It is interlinked with SOP 7.1 (access authorisation depends on personnel security status) and SOP 5.1 (HR recruitment alignment).

5.1 Pre-Mission (Preparedness)

Step	Key Actions	Timeline	Annex
Compile Personnel Security Baseline	Extract staff list from HR; classify by exposure (field/HQ/ICT/logistics/executive); identify enhanced vetting posts	Within 30 days; quarterly update	7.E
Conduct Vetting and Screening	Verify national ID, references, employment history; police clearance for high-risk positions; conflict-of-interest checks	Within 60 days existing; per recruitment new	7.E
Health, Safety and Security Induction	Enrol all staff in SHOC Security, OHS, Duty-of-Care induction (ISO 45001); cover personal safety, VPSHR, incident reporting	≥90% certified annually	7.K
Movement and Contact Protocols	Maintain contact details and next-of-kin; define check-in/checkout rules; agree escalation triggers for missed check-ins	Within 45 days; review annually	7.G
Integrate with Access and Facility Security	Share Personnel Security Register with SOP 7.1; identify staff for high-risk zones; coordinate escort rules with vendor	Within 60 days; update with staffing changes	—

5.2 On-Mission (Operations)

Step	Key Actions	Timeline
Activate Personnel Security Level	Mirror SOP 7.1 Level; communicate precautions to all staff via IM Portal, SMS, email	≤1 hour
Pre-Deployment Briefing and Clearance	Verify valid vetting and induction; incident-specific security briefing; confirm emergency contacts	≤2 hours before departure
Movement Control and Check-In	Movement plan with 2–4 hour check-ins; IM Portal/SMS/radio logs; vendor escorts where needed	Continuous; missed check-in escalated ≤30 min
Incident and Threat Reporting	Staff report via Annex 7.F or IM Portal; Head Ops classifies severity (BGYOR); notify ED for Orange/Red	15 min initial; 2hr full report
On-Shift Welfare Monitoring	Daily supervisor check-in (fatigue, stress, morale); welfare concerns in daily SitRep; flag staff needing rotation	Daily; severe cases immediately

5.3 Mission-End (Recovery)

Demobilisation and clearance: confirm return of staff, reconcile movement logs, de-activate temporary access (≤5 working days). Psychological debrief and welfare support per SOP 5.3

(≤10–14 days). Update Personnel Security Register (Annex 7.E) with incidents, training, restrictions (≤30 days). Lessons learned AAR with HR (SOP 5.1), Access Control (SOP 7.1), and Facility Security (SOP 7.3) (≤30 days).

5.4 Trainer's Notes

Sensitive exercise: Simulate a field deployment where a staff member misses two consecutive check-ins. Require trainees to execute the escalation protocol within 30 minutes, coordinate with the outsourced security vendor for escort/investigation, and document in the Movement Log (Annex 7.G). Also test the pre-deployment briefing: present a scenario where one team member has an expired vetting record and require the trainee to identify this as a deployment-blocking condition.

6. SOP 7.3: Facility and Equipment Security

SOP Reference: SOP 7.3 (Phases 1–3)

SOP 7.3 secures SHOC buildings, control rooms, data centres, EOCs, warehouses, vehicles, and specialised equipment against theft, vandalism, sabotage, environmental hazards, and disaster impacts.

6.1 Pre-Mission (Preparedness)

Step	Key Actions	Timeline	Annex
Facility and Asset Security Baseline	Compile facility list; map critical zones (servers, safe rooms, vaults, stockpiles); cross-check Asset Register	Within 60 days; annual review	7.H
Facility Security Risk Assessment	Physical Security Assessment methodology; rate risks using BGYOR; populate Security Risk Register	Within 90 days; bi-annually	7.D
Preventive Maintenance Plan	Define schedule for alarms, CCTV, UPS, generators, fire systems; include insurance and asset valuation	Plan within 60 days; quarterly checks	7.I
Lockdown and Evacuation Procedures	Identify lockdown levels and triggers; map evacuation routes, assembly points, safe rooms; integrate with OHS	Within 90 days; tested annually	7.J
Train Staff and Vendors	Include facility/equipment security in annual induction; role-specific training for drivers, ICT, warehouse, guards	≥90% trained; refreshed annually	7.K

6.2 On-Mission (Operations)

Step	Key Actions	Timeline
Activate Facility Security Level	Head Ops sets Level (aligned with SOP 7.1/7.2); notify vendors and all staff	≤1 hour
Implement Lockdown / Restricted Access	Partial or full lockdown per Annex 7.J; secure secondary entrances, roof access, plant rooms, loading bays	≤2 hours
Secure Critical Assets and Stockpiles	Confirm ICT rooms, safe rooms, vaults locked and monitored; coordinate with SCM for relief items and vehicles	Initial ≤4 hours; daily re-check
Maintain Backup Power and Comms	Activate UPS/generators when power instability detected; adequate fuel and spares; prioritise control room, server room, EOC	Within minutes of failure; daily fuel check
Monitor and Respond to Incidents	Log all facility/asset incidents in Annex 7.L; classify severity (BGYOR); escalate Orange/Red to Head Ops and ED	15 min initial; 2hr full report

6.3 Mission-End (Recovery)

Facility damage assessment (≤10 working days). Asset Register reconciliation against pre-disaster register; classify losses as insured/uninsured using Annex 7.M (≤20 working days). Plan and implement recovery and upgrades (≤30 days). AAR focused on facility/equipment security performance; propose SOP 7.3 revisions (≤45 days).

6.4 Trainer's Notes

Practical exercise: Simulate a power outage during On-Mission operations affecting the control room and server room. Require trainees to: (a) activate backup power (UPS immediate, generator within target), (b) coordinate with ICT to prioritise critical systems, (c) log the incident in Annex 7.L, (d) verify critical asset security during the outage using the Critical Asset Security Checklist, and (e) document the event for the post-mission facility damage assessment (Annex 7.M).

7. Security Level Framework

Trainees must know the four Security Levels and their operational implications across all three SOPs:

Level	Access Control (SOP 7.1)	Personnel Security (SOP 7.2)	Facility Security (SOP 7.3)
Green	Normal operations; routine monitoring	Standard vetting; routine check-ins	Normal maintenance; standard patrols
Yellow	Enhanced monitoring; increased visitor scrutiny	Elevated awareness; more frequent check-ins	Increased patrol frequency; verify backup systems
Orange	Restricted access; Need-to-Go enforcement; ED notified	Pre-deployment clearance mandatory; escorts activated; NDMA informed	Partial lockdown; critical assets verified; incident reporting heightened
Red	Full lockdown; law enforcement notification	All non-essential movement halted; immediate welfare checks	Full lockdown; all secondary access sealed; 24/7 monitoring

Escalation thresholds: Yellow → Head Ops immediately. Orange → ED and NDMA ≤1 hour. Red → facility lockdown and law enforcement notification.

8. Annex Toolkit Quick Reference

Annex	Title	Linked SOP(s)
7.A	Visitor and Contractor Register	7.1
7.B	Security Incident / Breach Report Form	7.1 / 7.2
7.C	SLA Compliance Checklist	7.1 / 7.3
7.D	Security Risk Register Template	7.1 / 7.2 / 7.3
7.E	Personnel Security Register Template	7.2
7.F	Personnel Security Incident Form	7.2
7.G	Movement and Contact Protocol Template	7.2
7.H	Facility and Asset Security Baseline Template	7.3
7.I	Preventive Maintenance Plan Template	7.3
7.J	Lockdown and Evacuation Procedures Template	7.1 / 7.3
7.K	Training Log	7.2 / 7.3
7.L	Facility Incident Form	7.3
7.M	Asset Loss and Recovery Statement Template	7.3
7.N	Facility Compliance Checklist (M&E)	7.1 / 7.3

9. BGYOR Risk Registers

Each SOP has a dedicated risk register. The following are the highest-rated risks trainees must know:

SOP	Risk	Inherent	Residual	Key Mitigation
7.1	Unauthorised entry to Restricted/Critical zones	20 Red	6 Yellow	Zoned access, AMS, guard supervision, CCTV, audits
7.1	Access control system failure during operations	15 Red	6 Yellow	UPS/generator, manual fallback, paper registers
7.1	Insider threat bypassing controls	15 Red	6 Yellow	Dual custody, AMS log reviews, CCTV analytics, whistle-blower
7.2	Deployment of unvetted staff to high-risk environments	20 Red	6 Yellow	Mandatory pre-deployment vetting; Personnel Security Register
7.2	Staff exposure to violence, harassment or abduction	20 Red	6 Yellow	Security briefings, movement control, escorts, VPSHR
7.3	Perimeter breach without detection	20 Red	6 Yellow	Lighting, fences, CCTV, guard patrols, SOP 7.1 integration
7.3	Loss/theft of high-value ICT equipment or stockpiles	20 Red	6 Yellow	Secure storage, restricted access, inventory controls
7.3	Extended power outage affecting control rooms/data centres	15 Red	6 Yellow	UPS, generator, fuel management, IT continuity

10. Monitoring and Evaluation

KPI	Indicator	Frequency	Responsible
Access Incident Rate	Breaches or near-misses per month by severity	Monthly	Head Ops; IM; Security CM
Facility Security Readiness	% of facilities compliant with SOP 7.1 checks	Bi-annual	Head Ops; SCM; ICT
SLA Compliance	% of SLA KPIs met by security vendors	Quarterly	Head Ops; Finance; Security CM
Training Completion	% of staff and guards completing annual induction	Annual	HR; Site Supervisor
Risk Register Currency	Months since last Security Risk Register update	Bi-annual	Head Ops; IM

11. Assessment and Competency Verification

Competency	Assessment Method	Minimum Standard
Access zone classification	Map a facility into 4 zones with correct clearance levels	All zones correctly classified
Security Level declaration	Scenario: escalate from Green to Orange	Level declared ≤1hr; correct authority chain
Visitor management (surge)	Process 5 visitors under time pressure	Each processed ≤10 min; all logged in AMS
Incident logging and escalation	Complete Annex 7.B for a simulated breach	Logged ≤15 min; escalated correctly
Personnel vetting verification	Review 3 deployment files for vetting completeness	All gaps identified; deployment-blocking condition applied
Movement control and check-in	Execute movement plan with check-in schedule	Missed check-in escalated ≤30 min
Lockdown execution	Simulate partial lockdown per Annex 7.J	All secondary access sealed ≤2hr
Critical asset verification	Complete Critical Asset Security Checklist during scenario	All critical areas confirmed secure
Vendor SLA review	Assess vendor performance using Annex 7.C	All KPIs scored; improvement plan documented
Post-mission access audit	Reconcile access logs against CCTV for a simulated activation	All discrepancies identified; report within 10 days

Certification requirement: Security Focal Points and the Head of Operations must demonstrate competency across all ten areas. Annual drills (lockdown, evacuation) and bi-annual security assessments provide the primary assessment vehicles. Results feed into the Security Risk Register (Annex 7.D) and vendor SLA performance reviews.

— END OF TRAINING MANUAL —
